

Invitation to tenders in Romania

plant engineering
and construction

Romanian institutions place orders running into billions – every year! The financial resources are received from the Structural Fund and the EU Cohesion Fund, as well from Romanian budget. In this regard German companies are given great opportunities for the product distribution. Infrastructural arrangements, environmental protection, energy saving, as well as modernization of industry and agriculture – the list of these activities is long. Public procurement in Romania is modernized, but it is hard to guess when you are in Germany. Such companies as Steinbeis Transfer Management S.R.L. and Svasta Consult (Bucharest) are working together on gaining German firms' access to the financing of a project. STC works on projects coordination in Germany. Three basic service packages have been developed that can be used either separately or in aggregate:

- TenRO Search for appropriate tenders
- TenROplus Support in holding of a tender
- TenROman Project management in Romania

Project Partner

Svasta Consult S.R.L., Bucharest

Steinbeis Transfer Management S.R.L, Bucharest

Svasta Consult S.R.L. company of Bucharest was a part of consortium on initiating public purchases in Romania.
