

Enhance scientific cooperation

Enhance scientific cooperation

The Romanian Academy of Sciences and 65 research institutes rely on the cooperation with Steinbeis. The Memorandum of Understanding was signed on 29.11.2012 in the presence of Minister Peter Friedrich. Together for the EUSDR projects to be developed, which will be implemented within the framework of the action plans of PA7 (Wissensgesellschaft) and PA8 (competitiveness). The Academy is working with the National Academies of Hungary, Slovakia and Bulgaria, which are important actors in the science initiative "Science for the Danube Region". In addition, in Romania a number of national flagship projects are launched, supported by the respective competent ministries. Involved are part of the STZ Steinbeis Science, Technology & Economy and our Steinbeis Danube Center. In June 2012, the two centers were already co-organizer of the key stakeholders high-level meeting of the Academy of Sciences. In the academic flagship project "Danube International Centre for Advanced Studies" SDZ-manager Jürgen Raizner has already included the issues of socio-economic components. On the basis of cooperation, now were adopted a number of other projects which will be initiated. Key topics include energy and environmental issues. Critical to the success of the projects and their positive effect in the Danube strategy is the practical use of research results. This is about Steinbeis.

29.11.2012: Empfang im Staatsministerium.
