

Economic Promotion and Regional Development in Eastern Europe

In our Transfer Center we put special value on actions aimed at strengthening industrial and research capacity of the Eastern Europe countries. We analyze general conditions and study original situation, and on this basis we develop individual strategies for constant improvement of performance and competitiveness.

The priority of such projects is taking into account local interests. We achieve this by intended partner cooperation with local partners. To successfully solve various tasks, we engage experts from the entire Steinbeis Association to work on current projects.
