

Welcome! Your export to Germany

ToGer

Your company and your offer will be presented on the Steinbeis Transfer Center website. STC will create for you a separate page on its site. The information will be displayed in the German language. Your company's photo/logo and the link to your own website will be presented as well. The STC website is registered in numerous search engines and widely spread in the Internet.

ToGerPlus

The basic ToGer service is maintained. Presentation of a company and its line of goods is expanded to 3 to 4 pages. STC additionally assesses your company's performance. On the basis of this assessment STC substantiates and gives well-defined recommendations regarding your chances for cooperation with German firms.

ToGerAct

The ToGerPlus service is maintained. Beside your company's presentation, analysis and recommendations, STC carries out the selection of potential customers and partners for cooperation in Germany. They receive a letter of recommendation from STC with your company's description. The numbers of firms, to whom such offers will be sent, is negotiated with you. What all the three service packages have in common is the fact that STC acts as a contact person for German customers.
