

Facilitating transnational cooperation among research infrastructures

In order to foster transnational cooperation on research and innovation (R&I) in Danube Region, a number of events is scheduled. Thematic basis are the societal challenges Energy and Bioeconomy. Objectives in detail:

to inform participants on legal framework to develop or to link research infrastructures

to inform participants on best practices, success stories and case studies

to inform participants on the procedure for the evaluation and selection of two pilot actions that will be funded with 50.000 EUR each from the Danube-INCO.NET budget

to trigger participants' interest in participating in the call that will be launched later in 2015 for the selection of pilot actions

Networking

1st Clustering Workshop: 28.01.2015, Trieste; thematic focus on European Research Infrastructure Consortium (ERIC)

2nd Clustering Workshop: 28.04.2015, Stuttgart; thematic focus on European Technology Platform (ETP)

3rd Clustering Workshop: 02.07.2015, Berlin; thematic focus on Knowledge & Innovation Community (KIC)

Workshops 4 and 5 will follow in second part of 2016 in combination with a brokerage event (Slovakia) and a triple-helix-conference (Hungary).

Stakeholder's database

Danube-INCO.NET is carrying out a mapping exercise aimed to identify the most relevant stakeholders active in the field of energy efficiency, renewable energy and the bioeconomy in the Danube Region.

After registration you have the chance to receive tailored and updated information for the development of international energy-related projects, and to participate in the clustering events and in the selection process for the funding of pilot activities. to registration
