

Invitation to Cooperation meets with interest in Odessa

SDZ-Director Raizner invites Ukrainian institutions to cooperation in the Danube region. Danube Investment Forum in Odessa meets with great interest the Raizners invitation. Ukraine is included with 4 southern oblasts formally in the Danube Strategy. So far, the cooperation in the regions was however difficult. There is need of projects and ideas. However, it lacks partners from the Danube region for the joint implementation of projects - and also the understanding of the European perspective. The Steinbeis Danube Centre and the Council of Danube Cities and Regions will provide this. A cooperation agreement with the regional administration of Odessa is completed. The Danube center has interesting project proposals and requests from Odessa. Main topics are measures to develop the infrastructure, the cooperation of port and transport services, food production and energy efficiency
